Raise Your Own LUSCIOUS CHERRIES

There's nothing like the delicious flavor of home grown, fresh picked cherries. And there's no excuse not to have your own and plenty of them. The first picking pays for the tree.

EARLY RICHMOND

6308. The May Pie Cherry. Still the favorite where early fruit is wanted. A bright red cherry, juicy and full of fine flavor. Bears heavily and is the hardiest of all the red cherries. You should certainly have this one.

ENGLISH MORELLO

6309. Almost black when fully ripe. The fruit is very large. Makes fine jellies and excellent for preserving and canning and eating off the tree. Ripens in July after the other cherries have been used. One of the very hardiest.

IMPROVED MONTMORENCY

6310. The big red cherry. Best for canning. Ripens 10 to 12 days after Early Richmond. Yields heavily and ripens evenly. Great for pies and sauce. This is the one by which all other red cherries are judged.

Mrs. May's CHERRY PIE ORCHARD

Cherries have been scarce and high priced. Most families haven't had nearly as many as they wanted for fresh cherry pies and sauces and for home canning. **You can have plenty, all you want, enjoy them at their freshest and best . . . by planting trees of your own this year.** The first bushel you pick will more than pay for the tree. By planting these three varieties you'll have long weeks with all the cherries you want. You'll be eating Early Richmond in late May. Improved Montmorency will ripen about 10 days later. English Morello ripens still later, in July. **We will send you improved strains, heavy rooted and well branched trees. Order early.**

Easy to Send Money

Your personal check is good with us, or you can send a Money Order or Bank Draft. If you send currency or coin, wrap it carefully and you should then register your letter. MOST THINGS POSTPAID

You will see that most everything in this catalog is delivered to you Postpaid. This represents a big saving to you. Some things too large to go by parcel post are quoted "Not Prepaid". We ship these by Express. But, since nursery stock goes at the low second class express rate, the charges you pay on such shipments are generally as cheap as freight, sometimes even less.

If your order includes some of the larger items which must go by Express and some which would be postpaid by us, then we will send the entire order by Express. This will avoid making two separate shipments.

For this privilege we will include some extra nursery stock which has a greater value than the additional express charge amounts to.

Early Orders are always a great help to us and we express our appreciation of them with these premiums. Even though the nursery stock isn't shipped until planting time, we can get all the "book work" done well ahead of the last minute rush. This really makes a saving for us, in worry as well as work, and so we are glad to say "thank you" for early orders with these premiums. If you send your nursery order reasonably early, you are welcome to your choice of the premiums on the schedule listed below.

Any 1 Premium on Nursery Orders of \$4.00 to \$6.00

Any 4 Premiums on Nursery Orders of \$10.00 or more

You are entitled to more than one premium with the larger orders. You can have them alike or assorted. Please be sure to write your choice of premiums on your order; otherwise, we will not know what you want and none will be sent. We may run out of some of the premiums as the season gets farther along, and in that case we reserve the right to send you our choice of the premiums.

ONE OF THE PRETTIEST NEW FLOWERS in our Test Gardens last year was the Dwarf Annual Phlox, above. You will find it and other new annuals pictured in color on Page 19.

GREEN BEANS IN SEPTEMBER. Yes, the picture above was taken in September. You never saw nicer green beans. They were planted July 19 in our 76-acre Test Gardens. Page 25 explains our important program of Triple-Tested Seeds. We tested 47 varieties of beans last year. The best of them, by test, are listed on Pages 26 and 27.

FORTY ACRES OF PEONIES. Visitors by the thousands drove here last Spring to see this glorious sight. Your orders for Peonies this Spring and next Fall will be filled with big root divisions from this 40-acre planting.

This field of Peonies is part of over 1500 acres of nursery stock being grown within a few miles of Shenandoah by my grandfather, E. S. Welch. Of course, I am out in the fields a lot, checking on the growth and handling of the tens of thousands of trees and bushes and plants being grown. That's why I am so confident of their high quality and so sure of the satisfaction they will bring to you. Other pictures taken in my grandfather's nursery are shown below.

Dear Friends:

I wish I could make some comforting sense out of and come to some definite conclusions about National and International affairs. But, the truth is, when I look very far away from Shenandoah and my own family and friends, I really don't know what to think.

It seems necessary and certain that we as a nation are in for years when we must keep a large and strong army. Some raw materials are already being rationed and I suppose no one knows when or how many other things will go on the rationed list. Prices in general and living costs in particular have been climbing higher and higher. It is enough to confuse anyone.

In these times there doesn't seem much that we, as individuals, can do about those big problems. We must just go right ahead "sawing wood" and tending to our own businesses the best way we know how.

I am glad to tell you that inflation has not hit our business very hard as yet. Our material and labor costs have gone up, as they have in every business, and postal rates have increased. But, most prices in this catalog are the same as last year and nearly everything is still postpaid to you. It is very probable that all our prices will have to go up after the Spring season.

It is certainly a good time to get the trees and flowers and shrubs you need to beautify your home. And there never was a time when the fine foods you can raise in your garden would save you so much actual cash. With food prices so high, we look for folks who haven't always had a garden to sure have one this year.

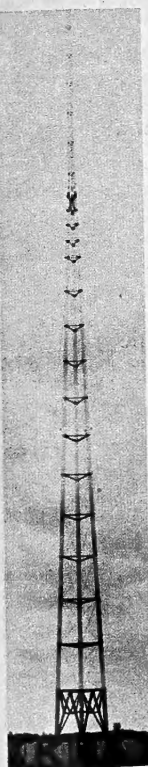

At the start of the season we will have ample stocks of nearly everything we list. But, there never was a year when we didn't run out of some things. You will be wise to send your order early. You will be rewarded, too, because we are glad to give very worthwhile premiums for early orders. These special gifts for early orders for nursery stock are explained on the opposite page. On page 25 you will find still more special gifts on early orders for garden seed. Make out your order now and send it to us early so we can send you these fine "extras."

Depend on us to do our level best to deserve your confidence and your business. I hope you have a fine year, with happiness and success and profit.

Sincerely,

Edward May

Thousands of Apple Trees
Growing in Shenandoah Last Year

The picture above was taken late in September last year in my grandfather's nursery here at Shenandoah. In all, there were over 400 thousand being grown in his nursery last year and you see thousands of them in the picture.

I enjoy going out into the nursery to see what progress the trees and plants and shrubs are making. It is because of this that I can so heartily recommend the quality of the nursery stock we have ready to send to you.

The apple trees made a very fine growth and we are all proud of the excellent quality we will be filling your orders with this year.

The tree is an ornamental beauty when in bloom and the fruit is easy to pick. Dwarf apple trees bear 2 to

HUSKIER, THRIFTIER, YOUNGER BEARING

Apple Pie . . . Apple Sauce Baked Apples . . . Strudel

We all love apples and the many delicious dishes made with apples. But, lots of folks are not enjoying them very often . . . because apples have been very expensive and scarce. Even a small grocery sack of apples takes a big bite out of a dollar bill. The answer is—

Plant Earl May apple trees this year and grow your own. It's the way to an abundance of this luscious fruit . . . at a very small fraction of what you'd pay "the other fellow".

Years of selective propagation put Earl May's Apple Trees definitely in the superior class. *Bud selection has been made from parent stock which is truest-to-type, fruits earliest, and bears the most and finest apples. These trees are repeatedly cultivated and trimmed as they grow to develop heavy root systems and good branch structure. They are superior . . . in size and all-around quality.* They are big and sturdy and husky. Thousands of our customers will tell you "the best I ever saw". Order early so you can plant them early for faster growth and earlier fruit.

CONCORD

6601. The all-time favorite grape because it is such a heavy bearer and so hardy. The clusters of glossy black fruit are uniformly large and wide. While Concord is essentially a northern grape, it can be grown in the South, too. We'll send you healthy, heavy vines from outdoor grown stock. Guaranteed to please you.

"APPLE ORCHARD" Quintuplet Tree

QUINTUPLET-APPLE TREE

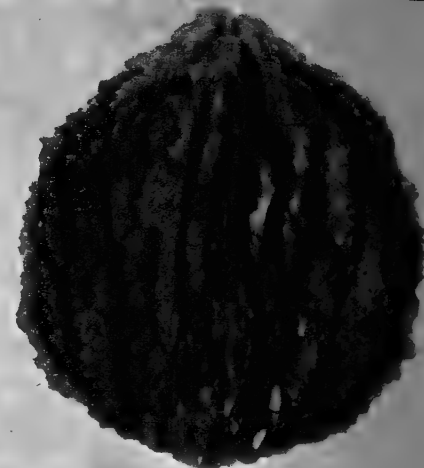

Here is one of the miracle achievements of Horticulture! A single tree from which you can pick 5 separate and distinct varieties of Apples. *You can enjoy the many fruits of a whole apple orchard even though you have room for only one or two trees.* How is the Quintuplet "Apple Orchard tree" produced? Five expert budders are assigned to one row of trees. Each man carries buds of only one variety and inserts one bud in each tree. When these five budders have finished the row, each tree has those five varieties budded into it. Since each bud makes its own separate limb growth, they will produce the exact variety of fruit which was budded on. *Plant one or two of our Quintuplet Orchard trees and you will really have as many or even more kinds of apples than are produced in most home orchards.*

6126. When you plant our Standard Quintuplet Apple Orchard tree, you pick (1) **Wealthy**, an early Fall all-purpose apple; (2) **Yellow Delicious**, late Fall eating and baking apple; (3) **All Red Delicious**, finest of all eating apples; (4) **All Red Jonathan**, greatest all-purpose apple, and (5) **Crimson Winesap**, fine for eating and cooking and one of the best winter apples.

TART and DELICIOUS

PLUM BUTTER, JELL, PUDDING.

No reason why you can't have plenty of plums for all the good things they make. A few trees and you'll be picking plums by the basketful. The first big yield will more than pay for the cost of your trees. From then on, for years to come, you'll have an abundance of fruit and the only cost will be your time in picking it.

Earl May PLUM THICKET

The Plum is our hardiest, most dependable fruit. But remember, plums like company of their own kind. They need company, too, because it is cross pollenization that makes great yields. **Every twig becomes loaded, the branches bend with the weight.** That's the result of planting several varieties, including a good pollinizer. We have selected 4 of the finest and one of them (Toka) is the extra pollinizer you need. Plant them and have lots of luscious, juicy fruit.

HYBRID CUCUMBER

354. Outyields Others And Consistently Yields When Others Fail. (Burpee, 60 Days). For 3 years in a row it has been the outstanding leader in our Test Gardens. We test planted 45 different cucumber varieties last year and this one again out-did them all. Produces after others have run down and quit. The cucumbers are very excellent, too! Beautiful green color, smoothly formed, 6 to 7 inches long, 1½ to 2 inches through. Full rounded ends with the smallest seed cavity and the smallest seeds you ever saw. It's the grand champion of them all and we recommend it to you 100%. **Pkt. (enough seeds for 5 hills) 25c, Postpaid.**

(Other Cucumbers See Page 31.)

HYBRID SWEET CORN

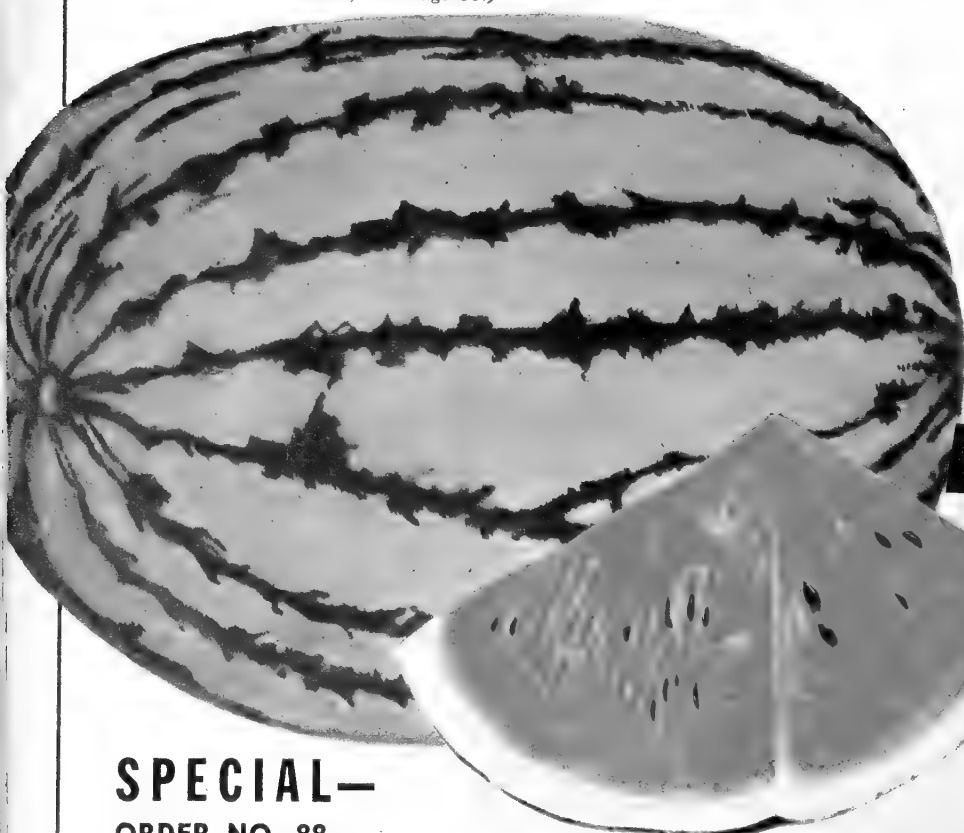

146. IOCHIEF (85 Days). We introduced this great new hybrid to our customers last year, after it had proved to be one of the best of the sweet corns in our Test Gardens. *Again this year it ranked with the best we have ever seen or ever eaten.* Our good judgment was confirmed when IOCHIEF won nationwide recognition and has been awarded a Gold Medal in the 1951 All-America Trials. (The originator is Dr. Haber, of Iowa State College, Ames, Iowa).

Iochief is Sugar-sweet, extra tender, and is unsurpassed for fine flavor. A feature: it holds its prime condition longer than others! The tapered ears are 7 to 8 inches long, with deep kernels. It makes an exact uniform growth and yields very heavily. For eating fresh, home canning and quick freezing, we certainly say, "Plant Iochief." Plant it along side of your favorite and we are sure you will be as enthused as hundreds of our customers already are.

482 VEGETABLE VARIETIES TESTED HERE LAST YEAR

Our Triple-Tested program is the biggest and most important advance in the garden seed business in many years. Every gardener should read the details of this great program printed at the right. It shows you just how much trouble and expense we go to in order to send you the best seed of the finest varieties.

It is here in our Test Gardens that we look at new varieties and new strains. They are planted right along side of varieties we know real well. Comparisons are made of early growth and development, of plant size and foliage, of yields, and of flavor and tenderness.

It is a tremendous big job when you keep records on 482 varieties and strains of vegetables as we did last year. But it is the one and only way we can really know what we are talking about. On the following pages you will find the varieties we recommend. Not one of them is listed by guess or by accident. They have earned recommendation by actual performance and actual superiority.

Please order early and remember to ask for the early order premiums shown at the left.

Just room to thank all of you for the many fine orders sent us last season. We will always do our level best to deserve your orders and hope you will recommend us to your friends and neighbors.

Sincerely,

Edward May

If you want to be first to eat good things from your garden, watch for this "EARLY BIRD" emblem. It shows you the earliest varieties.

NEW WONDER MELON SEEDLESS HYBRID WATERMELON

473. So new we have never seen it grow. But, reports are so very enthusiastic that we are offering it without our usual test plantings. The biggest feature: NO SEEDS! Another great feature: TRUE HYBRID VIGOR. Means greater resistance, consistently bigger yields. Besides all that, laboratory reports show the reddish pink flesh is MUCH SWEETER than that of other melons. EARLY MATURITY is still another feature. Melons run 10 to 15 lbs. Seed is imported and very expensive.

✓ FIRST IN OUR LABORATORY

Every packet, every pound of our vegetable seeds is Laboratory Tested to assure you High Germination. We know they are ready and "anxious" to grow before they are ever put in the packet and bags to be sent out to you. Literally, thousands of these tests are made each year in our laboratory. That's one reason why our customers report such good stands and such high yields from their gardens.

✓ SECOND IN OUR 76-ACRE TEST GARDENS

Every year we plant scores of varieties of vegetables in our 76-acre test gardens . . . old favorites and new ones, too. In these tests we search out the thriftier, heavier yielding varieties. Time and again we discover a superior plant growing in an already established strain. From this superior plant our improved strains are developed. The name of the variety is the same but our tests show one strain to be very much better than the others. It is the better, the improved strains, we packet for our customers.

✓ THIRD ON OUR TABLES

Yes, that's the final and very important test . . . because you want the finer textured, finer flavored vegetables from your garden. We bring in truck loads of vegetables from our test gardens and just pass them out to folks here at the seedhouse to try in their own kitchens. From all their reports we know exactly which varieties give the greatest taste satisfaction. Plant our seeds and enjoy the finer textured, finer flavored, really nicer varieties.

Garden Seed Guarantee

We Guarantee Our Vegetable and Flower Seeds to Be:

1. Good, Strong, High Germinating Seed.
2. True to Name and As Represented.
3. Satisfactory or Your Money Back.

Our seeds are sold subject to your test and approval upon delivery to you. If in your judgment they are unsatisfactory return them to us within ten days and we will make full refund. We give no warranty, express or implied, as to the productiveness of any seeds we sell and we will not be in any way responsible for the crop. Our liability in all instance is limited to the purchase price of the seed.

GREEN POD BUSH BEANS

CULTURE: 1 pound plants a 100 ft. row, 90 pounds per acre. Wait until the ground is good and warm to plant beans. Plant 2 or 3 inches apart, about 2 inches deep, rows 18 to 24 inches apart. Avoid picking or cultivating when plants are wet. 1 lb. should produce about 2 bushels of snap beans.

INOCULATE BEANS FOR EARLIER BEARING AND BIGGER YIELDS.

Use Earl May Inoculation. Simple, easy directions with each order. Enough inoculation for 2 to 4 lbs. of Garden Beans and Peas. Only 10c, Postpaid. Be sure you include it on your order.

Tendergreen

Delicious, Tender, Stringless

104. (52 Days.) The best of the improved green beans. And it IS improved! *Firm, tender pods are really stringless. They are often 7 inches long and you pick them by the handful.* The flavor is the best you've ever enjoyed. And besides all that, New Tendergreen is a great and dependable yielder. Plant it right along side of your favorite green bean and you'll see its superiority for yourself.

Big 3-oz. Pkt. 15c; 1/2 lb. 33c; 1 lb. 55c; 2 lbs. 95c, Postpaid

Contender

107. (54 days.) A new green bean of exceptional merit. Introduced by the U. S. Department of Agriculture and recommended for its high resistance to bean diseases. Pods are extra long, round, slightly curved, medium dark green. Very tender and stringless. Makes a vigorous growth and consistently sets heavy yields. If you have been bothered with mosaic or mildew in your bean plantings, plant Contender this time. **Big 3-Oz. Pkt. 15c; 1/2 lb. 39c; 1 lb. 65c; 2 lbs. \$1.15, Postpaid.**

TOP CROP

105. All-American winner in 1949 and an outstanding star in our Test Gardens last year!

The plants make a vigorous growth and set an unbelievable big crop. The pods are long and round, meaty and really stringless. Can't be beat for flavor and tenderness. The big yield comes on during a short period, so you make a few big pickings instead of numerous small ones. The seeds inside the pod of Top Crop develop slowly, making an extra thick and meaty pod. They are still tender and stringless after others would be tough and useless. No matter what other green beans you have in your garden, be sure you plant TOP CROP this year. It's a winner. **Big 3-Oz. Pkt. 15c; 1/2 lb. 35c; 1 lb. 60c; 2 lbs. \$1.00, Postpaid.**

WORRIED ABOUT FOOD BILLS?

Very tender and delicious. The bushes make an extra strong growth and put on a tremendous yield. Hundreds of our customers report wonderful results with New Logan. Order early. ONIONS FROM OUR TEST GARDENS

We had an especially extensive planting on Onions last year because we were looking for a Hybrid Onion which we could recommend to home gardeners. Although we had 24 plantings of Hybrid Onions, none of them were as good as the onions from Yellow Sweet Spanish plants. The Hybrid Onions were not as large nor nearly as mild as Yellow Sweet Spanish. In all, we test planted 49 different varieties of Onions. We will keep looking and testing again next year. Meanwhile, we are sure the best Onions for the home gardener come from our Yellow Sweet Spanish and White Sweet Keeper plants. (The picture above was taken late in September, when we were making our second check on keeping quality.)

The cucumbers are of excellent quality, too. Nice green color, smooth, 7 to 8 inches long and 2 to $2\frac{1}{2}$ inches through (See color picture on Page 24). This is part of our Triple-Testing program to give you sure-to-grow seeds of the biggest yielding and best tasting vegetables.

WHITE HYBRIDS

A great yielder, wonderful flavor and tenderness. *Our Hybrid Stowell's intensifies these fine traits. Sweeter, more tender and the highest yielding of all the sweet corns.* The giant ears are 8 to 10 inches long, snowy white and very, very deep grained. A fine corn.

POPCORN

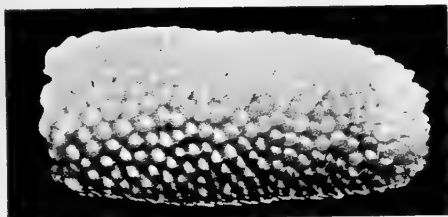

SOUTH AMERICAN YELLOW JUMBO HYBRID

55% GREATER YIELD
35% GREATER POPPING VOLUME

This great hybrid continues to amaze our customers with tremendous yields and wonderful popping qualities.

158. (Hybrid K4 or Purdue 32.) No accident about this wonder hybrid! No guesswork about the sensational records this hybrid popcorn is making! At Purdue University, where it was originated, exact tests have been made over a period of years. In a 4-year test, Purdue 32 yielded 55% more than Open Pollinated. In a 3-year test, it popped 35% greater volume. Giant popped kernels, the nearest hull-less of any corn you've ever eaten, and the flavor and texture are "excellent". Average a little better than 2 big ears per stalk. Out of 24 varieties in our tests, this was the best. Big Stalks, almost like field corn. We have a limited production of this South American Jumbo Hybrid (Purdue 32) this year. You need to know what a wonder hybrid it really is. Don't delay. Send your order today.

CULTURE

Planted in hills, plant 3 or 4 kernels to the hill with hills 18 inches apart, or drop kernels 6 inches apart in row. Put rows 2½ to 3 feet apart. 6 to 8 pounds of Yellow Jumbo, 4 to 5 pounds of the small white plants an acre.

ONION PLANTS

Easy to plant. Easy to grow. And they make tremendous yields of big, mild, sweet onions.

Once you've seen and eaten fine big onions grown from plants, you'll always plant them. Light frosts and freezes, even a light snow, won't hurt them. So, you can put them out extra early to get a full growing season. Plant them about 1½ inches apart. The first time you thin them out for "green" onions. The next thinning for stewed onions. Then, let the rest go on to make you plenty for fall and winter use. We have the two best-by-test varieties: **WHITE BERMUDA**, the mildest you've ever eaten, and **YELLOW SWEET SPANISH**, a wonderfully mild onion that keeps for months! Both must be planted early if you want the most and best for your money. So, order early. We'll ship at the right time.

NEW HYBRID ONION

TOMATOES

RUTGER'S MAIN CROP (77 DAYS)

Favorite for Canning

765. We introduced this great tomato 11 years ago and it has been growing in popularity ever since. It is the best, large, red, main crop tomato of them all. It is the most dependable big crop tomato, too. **The fruits are large and the quality is unsurpassed. The plants are strong and have just enough foliage to protect the fruits from sun scald.** The large, bright scarlet tomatoes ripen from the inside out, evenly all the way through. The deep red, solid flesh is exceptionally fine for slicing and canning. No hard cores. **They hold their large uniform size and keep bearing clear up until frost hits them in late fall.** We had Rutgers Tomatoes this year from our own vines up until early in October. You'll get a larger yield from Rutgers than any other variety we know of. An all around, all purpose, home garden tomato.

Big Pkt. (over 800 seeds) 10c; 1/2 oz. 30c; ounce 55c; 1/4 lb. \$1.65, Postpaid

Weeks Ahead of Main Crop Varieties

RED CLOUD

Made wonderful records again last year against very unfavorable conditions.

761. (57 days.) **You have never seen a tomato like Red Cloud.** When the picture above was taken there were 83 Red Clouds on that one vine. Two pickings had already been made. (Foliage was tucked under to show the tomatoes.) **Red Cloud tomatoes are firm, smooth, meaty, and medium size . . . exactly the kind you prefer for slicing and canning.** And you can see how easy they are to find and to pick. Red Cloud ripens unbelievably early! Plants set out early in May yield some ripe tomatoes in Mid-July and will be in full production by August 1st. **Three to four weeks earlier than Rutgers!** You can be eating Red Cloud out of your garden when tomatoes are selling for 7c to 10c apiece. Order Today.

Pkt. 15c; 1/4 oz. 35c; 1/2 oz. 60c, Postpaid

CULTURE: 1 packet produces 100 plants; 1 ounce about 1500 plants. Four or five weeks ahead of when you want to set plants in the garden start the seed in a hotbed or small box in the window. Plant rows 3 inches apart, cover 1/2 to 3/4 inch deep. When plants are 1 inch high transplant to 1 inch apart each way. When all danger of frost is past set the plants in the garden 3 to 4 feet apart each way.

NEW HYBRID EARLY BIRD

Vigorous Producer of Fine Early Fruit

752. This hybrid was bred specifically to bring you a prolific yield of extra early tomatoes. Hybrid Early Bird is from 10 days to 2 weeks earlier than main crop varieties. It has the great hybrid vigor to come on fast and repeatedly set an abundant lot of fruit. The tomatoes are medium large, smooth, and, unlike some of the early varieties, they are solid and meaty. This extra earliness and hybrid vigor are insurance for you. Don't put all your eggs in one basket. Plant some of this new early hybrid as well as your favorite main crop variety.

Pkt. 25c, Postpaid

SIoux

Smoother Large Early Tomato

762. (65 days.) You can count dozens of big smooth tomatoes on the Sioux vine above. The foliage was removed to show you what a wonderful set of fine fruit you can expect from this new variety. The fruit is large, extra smooth, and much more meaty-solid than the old varieties. Sioux ripens uniformly to a beautiful bright red (no green shoulders or spots) and the flavor is truly delicious. Be sure you have Sioux in your garden this year. You'll agree it is a great variety.

Big Pkt. 15c; 1/4 ounce 30c; ounce 90c, Postpaid.
(See Plant prices at the left.)

685. (70 days.) Entirely different from others. This native of New Zealand thrives right on through the hot weather and gives you wonderfully fine flavored "greens" right up until frost. Brownell SUB-ZERO HYBRID TEA ROSES

Brownell Sub-Zero Roses come through winters of 15° below zero without any protection at all. But, if protection of a good mulch is provided, they will winter in areas where temperatures of 15° to 40° below zero are expected. For size, form and colors the Brownell Sub-Zero Roses compare with the best. The blooms are large and, due to extra thriftiness and hardiness, the bushes bloom more abundantly and more consistently throughout the season. For dependable year-after-year beauty and loveliness and fragrance, plant Brownell Sub-Zero Roses this Spring. Order early so you can plant them early.

The whole story of Earl May TREATED Lawn Grass Seeds is told in the picture above. Same seed was used in both tests. Same number of seeds. Same soil. Same conditions. But look at how much thicker and heavier the stand of grass is where the seed was treated! Fungus, bacteria, diseases, rot, and insects killed a great deal of the untreated seed.

It just didn't have a chance to come up. Our special lawn treatment protects Earl May Lawn Grass Seeds against these hazards. You can readily see the difference in these tests pictured above. You are sure to see that difference in your own lawn . . . up to 46 1/2% increase in stand. And you'll still see the wonderful effect of this seed treatment throughout the season. Your better, healthier stand of young grass will grow into a heavier lawn. It will just naturally offer much greater resistance to dandelions, plantain, water grass, and the other weeds which get into thinner stands of weaker grass.

By all means plant Earl May TREATED Lawn Grass Seed this Spring. The same high quality, heavy weight, new crop seed plus this most effective treatment to assure you the utmost success with your lawn. Sow lawn grass seed early this Spring. Order yours right now.
